PROJECTS

Title : Register Form Website

Description :

　　　I have created a webpage for register form. First I'm using router for connecting three pages. The first page for home page it's gives some introduction about our website. Then second page have curd operations for Add, Delete, Edit, Update, View data's in register form and finally third page gives users ratings   about our website. I have created all these HTML 5, CSS 3, Bootstrap, Javascript, React JS.
